SUMMARY

Computer Science Engineering student with hands-on experience building AI/ML, Generative AI, cybersecurity, and cloud-based software systems. Experienced in developing multimodal AI applications, database monitoring and security systems, backend APIs, and full-stack applications using Java, Python, PyTorch, FastAPI, Docker, and AWS. Strong problem-solving foundation with 300+ LeetCode problems solved and experience applying AI systems engineering concepts through projects, hackathons, and industry internship experience.

EDUCATION

Keshav Memorial Institute of Technology — B-Tech (CSE)

Sep 2023 – Present | CGPA: **9.33**

Ratna Junior College — Intermediate (MPC)

2021 – 2023 | Percentage: **98.1%**

Howard Public School (CBSE) — Class X

2021 | CGPA: **9.8**

EXPERIENCE

Cyber Guard 360 — Cyber Security Intern | Aug 2025 – Dec 2025

- Assisted in developing and testing cybersecurity solutions for secure enterprise systems.
- Performed threat analysis, vulnerability assessment, log monitoring, and attack detection.
- Worked on secure system practices, monitoring tools, and database security workflows.
- Collaborated in implementing secure architectures and identifying suspicious activities in applications.

TECHNICAL SKILLS

Languages: Java, Python, C, C++, SQL

Data Structures & Algorithms: Data Structures, Algorithms, Problem Solving, Competitive Programming

Software Development: OOP, REST APIs, Socket Programming, Client-Server Architecture, MERN Stack, React.js, Node.js, Express.js, Flask, FastAPI, Flutter

AI / ML / GenAI: Machine Learning, Deep Learning, Transformers, GANs, LLMs, TensorFlow, PyTorch, ViT, BERT, RoBERTa, Pegasus

Databases: MySQL, MongoDB, Redis

Cloud & DevOps: AWS, Docker, Kubernetes, Jenkins, Prometheus, Grafana, Git, GitHub, Maven

Cybersecurity & Networking: Threat Analysis, Vulnerability Assessment, Secure Database Monitoring, Authentication & Authorization, RBAC, Wireshark, Burp Suite, Cisco Packet Tracer, Nagios, Linux

CODING & PROBLEM SOLVING

LeetCode: 330+ problems solved | 100+ additional problems attempted

Core Areas: Arrays, Strings, Hashing, Two Pointers, Sliding Window, Binary Search, Linked Lists, Trees, Graphs, BFS/DFS, Heaps, Backtracking, Dynamic Programming, Greedy, DSU, Topological Sort, Tries, Bit Manipulation

PROJECTS

❖ **DB Guard – Multimodal Database Monitoring System**

Domain: Cyber Security | July 2025 – Dec 2025 | Team Project

- Built a multimodal AI-assisted database monitoring and protection system integrating SQL query text, execution plans, logs, and KPIs to detect suspicious behavior and rank potential root causes.
- Implemented query classification into safe, alert-only, and approval-required operations with secure monitoring workflows.
- Developed activity logging, slow-query detection, client behavior tracking, and real-time monitoring dashboards.
- **Tech Stack:** MERN, Flask, Docker, Prometheus, Grafana, MySQL, Redis

❖ **GenAI Finance GPT – Mobile Application**

Domain: FinTech & Generative AI | Feb 2025 – July 2025 | Team Project

- Developed a GenAI-powered mobile application for **financial document classification, question answering, summarization, and sensitive-data masking** using multimodal AI pipelines.
- Integrated transformer-based **NLP and vision models** for intelligent document understanding and processing.
- **Tech Stack:** Flutter, FastAPI, AWS, PyTorch, ViT, RoBERTa, Pegasus, BERT

❖ **Jewelry Design Pattern Generation**

Domain: AI / ML | Aug 2024 – Dec 2024 | Team Project

- Developed a GAN-based AI system for generating customized jewelry design patterns, exploring automated creative design generation.
- **Tech Stack:** MERN Stack, GANs, Netlify

❖ **OptiVox – AI-Based Accessibility & Communication Assistant**

Domain: Assistive AI Technology | May 2025 | Hackathon Project

- Built an AI-powered accessibility platform incorporating gaze tracking, real-time AI-assisted communication, and interactive assistance workflows.
- **Tech Stack:** React.js, Flask, JavaScript, AI-Based Interaction Modules

❖ **SafeJourney – Smart Women Safety & Emergency Assistance Platform**

Domain: Social Impact / Safety Technology | November 2025 | Hackathon Project

- Developed a safety platform integrating emergency assistance, route-safety support, and rapid communication workflows.
- **Tech Stack:** MERN Stack, API Integration, JavaScript

❖ **Tara – AI Desktop Assistant | Side Project | 2-months(May 2024 & June 2026)**

- Built a modular AI desktop assistant with wake-word detection, speech-to-text, text-to-speech, intent routing, conversational interaction, and automated system/application actions.
- Integrated Gemini and Groq APIs for LLM-powered conversational reasoning and task execution, using prompt engineering for instruction-driven workflows.
- Designed modular components for memory, command history, workflow execution, and skill-based task routing to support multi-step user commands.

Projects & Internship Demo Videos: [Google Drive Demos](#)

ACHIEVEMENTS

❖ **Centific Hackathon 2.0 — AI Systems Engineering | Winner | Apr–May 2026 | 2-week Industry Hackathon | Selected from 13,000+ applicants Nationwide**

- Selected among ~300 participants nationwide for the AI Systems Engineering stream through a competitive selection process.
- Built Vidura, a Medical Scribe Workforce Intelligence platform with interactive workforce analytics and insight workflows.

- Developed/integrated a 3D virtual humanoid AI presenter capable of joining Microsoft Teams through API/cURL-triggered workflows, presenting the application, listening to user commands, responding conversationally, and performing actions during the presentation.
 - Evaluated across technical and soft-skill dimensions throughout the 2-week hackathon, including an industry-leader interview contributing 50% of the final evaluation.
- ❖ Winner — received AI Systems Engineer offer from Centific + ₹10,000 Amazon voucher.
 - ❖ 300+ LeetCode Problems Solved | 100+ Additional Problems Attempted
 - ❖ Hackathon Projects: Safe Routes, OptiVox
 - ❖ Data Analytics Workshop Completion
 - ❖ Certificates & Portfolio: [Google Drive Certificates](#)
